

Method to login

The left panel shows a MongoDB collection named 'users' with the following data:

Key	Value	Type
id	Objectid("5c4ef5d7c3d2dfb2...")	Objectid
name	marquitos	String
surname	hernani	String
nick	hernanid98	String
email	marquitosas@gmail.com	String
role	ROLE_USER	String
image	4KA500uFLRQOOcPvKyh029.jpg	String
password	\$2a\$10\$eR0AqR8obgasmrGfHm.Fff4d...	String
_v	0	Int32

The right panel shows a REST client request to `http://localhost:3800/api/login` with the following body:

KEY	VALUE	DESCRIPTION
email	marquitosas@gmail.com	
password	marcos	
gettoken	true	Delegation

Usamos el método “get token” para usarlo en el futuro como medio de autentificación

Update

The left panel shows a MongoDB collection named 'users' with the following data:

Key	Value	Type
id	Objectid("5c4ef5d7c3d2dfb2...")	Objectid
name	marquitos	String
surname	hernani	String
nick	hernanid98	String
email	marquitosas@gmail.com	String
role	ROLE_USER	String
image	4KA500uFLRQOOcPvKyh029.jpg	String
password	\$2a\$10\$eR0AqR8obgasmrGfHm.Fff4d...	String
_v	0	Int32

The right panel shows a REST client request to `http://localhost:3800/api/users/update/5c58315a6dcf29313c491ece` with the following body:

KEY	VALUE	DESCRIPTION
email	marioarnedo1@gmail.com	
password	soycometo	
token	eyJ0eXAiOiJKV1QiLCJhbGciOiJIUzI1NiJ9.eyJzdWIiOi...	

U have to give the token that the login's method gives to you in the headers:

The screenshot shows the Headers tab of a REST client request to `http://localhost:3800/api/users/update/5c58315a6dcf29313c491ece`. The headers are:

KEY	VALUE
Content-Type	application/x-www-form-urlencoded
Authorization	eyJ0eXAiOiJKV1QiLCJhbGciOiJIUzI1NiJ9.eyJzdWIiOi...

Upload user image

The screenshot illustrates the process of uploading a user image. It consists of three main components:

- MongoDB Console:** Shows a collection named 'users' with a document for user 'mario'. The document includes fields like 'name', 'surname', 'nick', 'email', 'role', 'image', and 'password'. The 'image' field contains a long alphanumeric string representing the image path.
- REST Client:** A POST request is shown to the endpoint `http://localhost:3800/api/upload-image-user/5c582d9fd89d310578b95880`. The request body is a form-data containing an 'image' key with the value '503155.jpg'.
- File Explorer:** Shows the 'Imágenes' folder containing several image files, including '503155.jpg' which is highlighted.

U have to pass the token:

KEY	VALUE
<input checked="" type="checkbox"/> Content-Type	application/x-www-form-urlencoded
<input checked="" type="checkbox"/> Authorization	eyJ0eXAiOiJKV1QiLCJhbGciOiJIUzI1Ni9.eyJzdWIiOi...
Key	Value

Response

See the profile image from a user

The screenshot illustrates the process of retrieving a user's profile image. It consists of three main components:

- MongoDB Console:** Shows the 'users' collection with a document for user 'mario'. The 'image' field contains the path 'O0wtuHCKxIR_LTrvv5yKD3DC.jpg'.
- REST Client:** A GET request is shown to the endpoint `http://localhost:3800/api/users/image/O0wtuHCKxIR_LTrvv5yKD3DC.jpg`. The request headers include 'Content-Type' and 'Authorization'.
- File Explorer:** Shows the 'uploads' folder containing the image file 'O0wtuHCKxIR_LTrvv5yKD3DC.jpg' which is highlighted.

Follow an user

U have to keep in mind that the token that u gives is the user that follows to the other people, the only think that u have to pass by get is the user and ur token

The screenshot shows a REST client interface with a POST request to `http://localhost:3800/api/follow/5c582d9f489d310578b95880`. The request headers are set to `Content-Type: application/x-www-form-urlencoded` and `Authorization: eyJ0eXA0QKVIQLCjhbGSc0JlUzd1Nj9.eyJzdWl0...`. The response area shows a message: "Hit the Send button to get a response."

On the left, a MongoDB collection named `users` is displayed. A red box highlights the user object with `_id: "5c5815a6dcf29313c491eca"`. A red arrow points from this user's `_id` to the path of the POST request in the REST client.

We are this user

Unfollow an user

U have to keep in mind that the token that u gives is the user that unfollows to the other people, the only think that u have to pass the user and ur token

The screenshot shows a REST client interface with a DELETE request to `http://localhost:3800/api/unfollow/5c582d9f489d310578b95880`. The request headers are set to `Content-Type: application/x-www-form-urlencoded` and `Authorization: eyJ0eXA0QKVIQLCjhbGSc0JlUzd1Nj9.eyJzdWl0...`. The response area shows a message: "Hit the Send button to get a response."

On the left, the same MongoDB collection `users` is displayed. A red box highlights the user object with `_id: "5c5815a6dcf29313c491eca"`. A red arrow points from this user's `_id` to the path of the DELETE request in the REST client.

U have to pass the user that u want to see the follows, and the token

U have to pass the user that u want to see the follows, and the token

The screenshot shows a REST client interface with the following details:

- URL:** `http://localhost:3800/api/following/5c58315a6dcf29313c491eece`
- Headers:**
 - Content-Type:** `application/x-www-form-urlencoded`
 - Authorization:** `eyJ0eXkiOiJ1b3RlLnVzcy5kaWw...`
- Body:** A JSON object representing a user:

```
{
  "total": 1,
  "pages": 1,
